

Thematic report on guiding the use of research search and literature review tools

On November 26, 2024, the faculty of public management – real estate organized a thematic report session on guiding the use of research search and literature review tools, presented by m.a. Phạm Minh Tiến from the office of scientific research management, ufm.

The session was attended by Dr. Nguyễn Thanh Nhã – Dean of the Faculty, together with faculty leaders, department heads, and all lecturers and staff, who actively participated in the training and discussions.

In his presentation, M.A. Phạm Minh Tiến provided detailed guidance on how to use various research search tools, identify research ideas, conduct literature reviews, and apply these skills in actual scientific research and the writing of academic papers for both domestic and international journals.

The session was rich in academic content and sparked lively discussions and experience-sharing among faculty members. Through this seminar, lecturers in the faculty developed new research ideas and formed new research groups focusing on areas of mutual interest.

Dr. Nguyễn Thanh Nhã expressed the aspiration that in 2025, the faculty of public management – real estate will see an increase in scientific research projects and academic papers published in both international and national journals. He also encouraged faculty members to be more confident and active in scientific and technological research activities.
