

Student seminar summary and awards for student scientific research activities in 2023 and launch of student research activities in 2024 – faculty of tax and customs

On the morning of July 23, 2024, the “2024 Student Scientific Research Seminar” organized by the faculty of tax and customs was successfully held, with the participation of esteemed lecturers and a large number of students from the faculty.

The guest speakers at the seminar included:

- Dr. Nguyễn Thị Kim Chi – Vice Head of the Department of Tax and Customs
- Dr. Trần Xuân Hằng – Lecturer, Department of Public Finance

The seminar began with a ceremony to summarize and present awards to student groups who achieved outstanding results in scientific research activities in 2023. The honored groups made remarkable contributions with creative and highly applicable research projects.

In addition, the seminar served as an opportunity for students to listen to valuable insights from the guest speakers on how to choose research topics within the expertise of the faculty of tax and customs, as well as receive guidance on how to prepare research proposals in accordance with the template provided by the Office of Scientific Research Management. All of these activities serve as a solid foundation for students’ upcoming research projects in 2024.

The seminar concluded in an atmosphere of excitement and inspiration. Attending students not only gained useful knowledge but also felt motivated to continue their passion for scientific research.

The success of the seminar demonstrates the attention and investment of the university in general and the faculty of tax and customs in particular toward student research activities, promising to build on the achievements of the past year and reach even greater accomplishments in the future.
