

A PRACTICAL STUDY TRIP FOR STUDENTS OF FACULTY OF PUBLIC MANAGEMENT _REAL ESTATE AT THE U&I LOGISTICS WAREHOUSE

On December 13, 2024, the Faculty of Public Management - Real Estate, in collaboration with the Recruitment Center - Business Relations, organized a practical study trip for students majoring in Tax - Customs to the U&I Logistics warehouse in Binh Duong.

This trip provided students with valuable real-world experiences, helping them gain a deeper understanding of the management and operation processes of the bonded warehouse – a crucial link in modern logistics. Here, students listened to insights from the leadership team and professional staff of U&I Logistics on optimizing storage and transportation operations, applying technology in supply chain management, as well as the challenges the company is facing. The trip not only provided specialized knowledge but also allowed students to engage with practical experiences, enhancing their observation and learning skills, thus laying a solid foundation for their future career development.

We sincerely thank the leaders of U&I Logistics for their continuous support and for providing valuable learning opportunities for UFM students. This partnership serves as a significant motivation for UFM to continue improving educational quality, connecting theory with practice.

We hope that trips will be increasingly expanded, helping students equip themselves with knowledge and skills to be ready to integrate into a highly competitive labor market.
